

Kiosk Loader

On-site cashless loading

Modern, sleek and built to last, the Kiosk Loader provides customers with a simple method of topping-up their cashless account.

Where customers may not have easy access to the Internet or a mobile phone, our Kiosks become an integral way to top-up accounts and track a history of transactions.

A customer simply inserts their ID card or taps their wristband to identify their account and from there they can manage their account using the touchscreen display.

"Our staff don't sit at computers so we needed another way to top-up. The Kiosks are perfect and give our staff the flexibility to load money using credit/debit card and notes. "

Topping-up & History

Customers can choose to top-up in a number of ways, including combinations of credit/debit card, notes and coins. Each Kiosk is built and configured to meet your requirements. It could even distribute visitor cards and provide refunds. Alongside the ability to top-up, the Kiosk screen also displays a full history of transactions for each customer, helping keep a track of spend and reducing transaction disputes.

User-friendly

The Kiosks come as either floor or wall mounted units depending on your environment and space. The advanced touchscreen features an Accessibility setting which flips buttons previously situated at the top of the screen, to the bottom. Customers are guided by visual aids and text instructing them how to insert their card or tap their wristband and how to top-up. The screens can also be used to advertise promotions and can be customised with logos and branding.

Real Benefits

- Meets Disability Discrimination Act (DDA) requirements
- Dedicated cashless loading facility on-site.
- Different configurations available including credit/debit card and cash.
- Browse a history of transactions.
- Can distribute visitor cards and provide refunds.
- Customisable promotional space and logo branding.
- Accessibility control flips buttons to a lower part of the screen.
- Floor or wall mounted models to suit your space.
- Stunning aesthetics.
